

BioMagic

treats your hair well

ABOUT OUR COMPANY

Alliance Kozmetik, is one of the biggest companies in Turkey regarding the production of hair dyes and various hair care products. It maintains in the sector as a progression of a business formation in 1976. The facilities of our company is all equipped by modern and new technology. The constant specialty of all the products produced since the beginning is the quality. The main factor that differs us from the other companies is the innovation, all the new products are based on improvement. There are many dealers of Alliance Kozmetik in domestic and abroad markets.

Formulation with Organic Certified Raw Materials, BioMagic Hair Color Cream preserves the naturalness of the hair, provides it vitality and brightness.

Following respected and careful standards, from beginning to end, our products are not tested on animals.

The formula enhanced with the newly-developed substitute materials prescribed by the European Commission Scientific Committee on Consumer Safety (SCCS) instead of ammonia, PPD and resorcinol

Beauty is inside out, for our hair to be beautiful, it shouldn't be harming anything in the process including animals. Our products are created without animal products or derivatives.

Sustainable packaging made from recyclable material. Many consumers care about the impact they have on the environment. This impact directly relates to the products they choose to buy and be loyal to.

Start of the oxidation period of the prepared color (dye+oxidant) is delayed, and thus, it is ensured that the pigments become active in the structure of hair. The Anti-age Microemulsion System carries more pigments into the hair cortex.

BIOMAGIC HAIR COLOR CREAM

Certified Organic Ingredients;

Thanks to its new formula containing Organic Certified Raw Materials, BioMagic Hair Color Cream preserves the naturalness of the hair, and provides the hair with vitality and brightness

The formula enhanced with the newly-developed substitute materials prescribed by the European Commission Scientific Committee on Consumer Safety (SCCS) instead of ammonia, PPD and resorcinol.

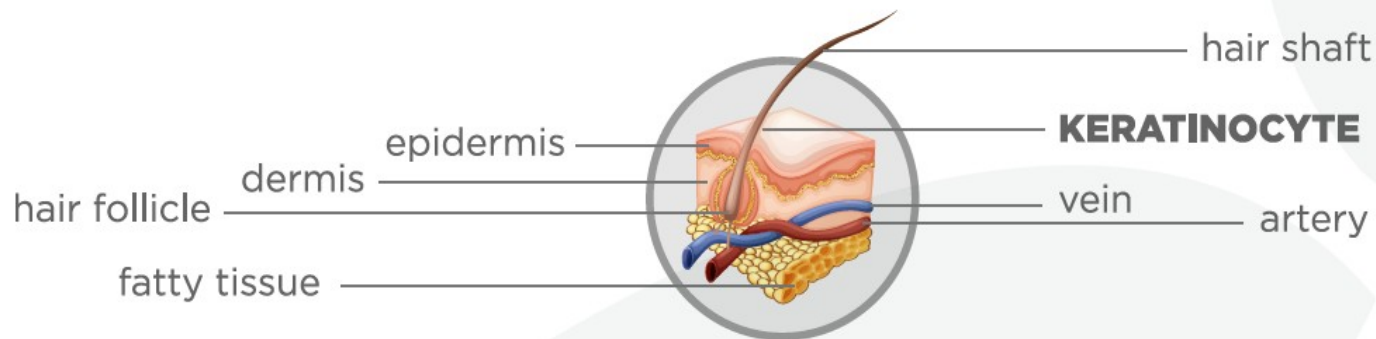

Perfect results with reliable ammonia-free formula; White covering superior to an ammonia product.

KERATIN-ADDED FORMULA

Keratin is a protein made of 18 aminoacids. It is naturally present in the skin, nails, hair. Keratin is in the surface of hair structure and makes it strong and healthy, it gives elasticity and structure. As the time goes by, keratin gets weaker in the hair structure and the hair becomes frizzy and fragile. When the keratin-added BioMagic Hair Color Cream is applied to hair, the keratin repairs the general structure and gives volume to the hair. In addition to making the hair silky, bright and smooth, the keratin-added BioMagic Hair Color Cream strengthens the hair against sunlight, wind or extreme heat changes and the external chemicals such as UVA.

ARGAN OIL-ADDED FORMULA

Argan oil is naturally rich in vitamin A, E and vitamin F, fat acids, linoleic acid, Omega 3 and Omega 6. Fat acids help the hair shaft and help to repair the damaged hair, vitamin E and antioxidants enhance natural hair growth and general health of the hair structure. The argan oil-added BioMagic Hair Color Cream softens the dry and fragile hair quickly by confining the moisture in the hair and scalp. It is an ideal solution especially for the hair that have become worn, dry and fragile because of the other hair colors.

ANTI-AGE MICROEMULSION SYSTEM

Anti-age is a type of care that slows down the aging process and also helps to fight its signs. As our skin, our hair also suffers aging signs with the effect of the environmental conditions such as maturation, sun and stress. With the Anti-age Microemulsion System, start of the oxidation period of the prepared color (dye+oxidant) is delayed, and it is ensured that the pigments become active in the structure of hair. The Anti-age Microemulsion System carries more pigments into the hair cortex. Thus, the pigments grow not in the color mixing pot but directly in the hair strand. Therefore, the pigments are absorbed better, exactly the desired tones are attained, and a longer permanence is achieved at the end of the application.

HGL SYSTEM

HELIOGENOL is an active ingredient obtained from plants which reduces the color fading and protects the hair shaft from external agents. This system of active ingredients and plant extracts with HELIOGENOL reduces color loss, protect the hair structure and shields from external agents. HELIOGENOL regenerates the hair structure, protecting the hair and leaving it instantly shiny.
